THAT'S WHY AKOTEC !

QUICK AND EASY ASSEMBLY

Our products are characterized by simple, quick and almost tool-free one-person assembly.

RELIABLE AND HIGH QUALITY

We provide safety. Due to the unique integrated overheating protection of our heat pipe tubes, our systems do not overcook.

ALL-ROUND SERVICE

With AKOTEC you enjoy the advantages of our all-round service.

We are there for you, from free planning and consultation to delivery to the construction site.

EASY PLANNER

Our easy system planner makes it possible to accomplish a technically correct solar system planning in just 3 minutes. With just a few entries, you have the technical design and the selection of all components of a complete solar thermal system.

AKOTEC TUBES

Our solar systems differ in their design in collectors with heat pipe tubes or with direct flow tubes.

heat pipe

- Protection against overheating at 100°C
- dry connection of the tube to the collector
- Quick and easy assembly and disassembly

direct flow

- flexible mounting methods
- simple plug-in connections
- mountable anywhere
